PROFESSIONAL SUMMARY

Certified Salesforce Developer with 5 years of experience at Deloitte USI delivering enterprise solutions across government, healthcare, defense, and social programs. Certified OmniStudio Developer proficient in OmniScripts, FlexCards, Integration Procedures, and DataRaptors. Skilled in Apex (bulkified), Lightning Web Components (LWC), and Experience Cloud (LWR). Experienced in REST API integrations with government systems (NMVTIS, Melissa API). Leverages AgentForce agents, prompt templates, Lightning types, and Smart Search to automate application processing, document classification, and compliance workflows, with a strong track record in technical leadership, effort estimation, and mentoring junior developers.

EDUCATION

Bachelor of Engineering (ECE), Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad | 2021 | CGPA: 8.25/10

CERTIFICATIONS

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I
- Salesforce Certified OmniStudio Developer
- Salesforce Certified AI Specialist
- Salesforce Certified Platform App Builder

PROFESSIONAL EXPERIENCE

Deloitte USI — Software Engineer II / Salesforce Developer (Sep 2021 – Present)

- Architected a Salesforce community engagement compliance platform for a government social programs client using LWC, Apex, OmniStudio, AgentForce agents, prompt templates, and Lightning types — enabling participant activity logging, exemption screening, and monthly hours tracking.
- Integrated AgentForce agents for application summarization, document classification, and OmniChannel Embedded Messaging on an Aura Experience Cloud portal, enabling AI-driven compliance workflows.
- Led the Medicaid asset technically; implemented AgentForce agent for application summarization and integrated Lightning types for structured document processing from uploaded applicant documents.
- Led the EFMP (Exceptional Family Member Program) asset for a U.S. military program, deploying a combined OmniStudio and LWC package with all security requirements addressed.
- Designed and deployed Salesforce CRM applications using Apex, LWC, and OmniStudio; engineered OmniScripts, FlexCards, Integration Procedures, and DataRaptors for workflow automation.
- Executed REST API integrations and customized Salesforce Flows across government, healthcare, and defense verticals.
- Built Experience Cloud portals and LWR sites; worked on AI enablement including AgentForce agents, prompt templates, document classification, and Smart Search across multiple assets.
- Led task analysis, effort estimation, and mentored junior developers on Salesforce best practices.

PROJECTS

EFMP – Defense (Aug 2025 – Dec 2025)

Built Quick Flows and OmniStudio solutions for DoD programs using Salesforce Public Sector Solutions (PSS) objects for mandatory service member enrollment workflows.

Communication Engagement (Mar 2025 – Present)

Architected a community engagement compliance platform managing activity logging (Employment, Volunteering, Job Training, Education), monthly compliance tracking, and AI-driven exemption screening. Integrated AgentForce agents, prompt templates, Lightning types, and OmniChannel Embedded Messaging (Copilot-first routing with Most Available

queue escalation) on an Aura Experience Cloud portal. Built a metadata-driven questionnaire architecture enabling no-code AI prompt configuration.

Medicaid (Oct 2024 – Present)

Built Salesforce UIs using LWC and Apex; introduced AgentForce policy engine and Smart Search, improving search accuracy. Implemented AgentForce agent for application summarization and Lightning types for document processing. Handled bulk address validation using Melissa API.

DMV (Oct 2023 – Oct 2024)

Designed dynamic LWC UIs; integrated DMV with NMVTIS (National Motor Vehicle Title Information System) via Apex callouts and REST API; applied AI-based document validation to reduce input errors.

CCL – Child Care Licensing (Nov 2023 – Mar 2024)

Implemented PSS Licensing & Permitting data model (Business License, License Application, Authorization, Inspection, Regulatory Case, Public Complaint). Built OmniStudio components and an LWC-based LWR Experience Cloud portal for applicant registration and compliance tracking.

SPEXS (Sep 2023 – Oct 2023)

Applied OmniStudio Integration Procedures and DataRaptors for person data service integrations.

NMVTIS (Feb 2023 – Sep 2023)

Integrated Salesforce with the National Motor Vehicle Title Information System (NMVTIS) via Apex callouts and OmniStudio; managed complex solicited and unsolicited API workflows.

Waste Management (Oct 2021 – Jan 2023)

Strengthened Salesforce CRM features, stabilized production issues, and enhanced functionalities during operate and maintain stage.

TECHNICAL SKILLS

Salesforce Core: Salesforce CRM, Apex Classes, SOQL, Apex Cursors, Lightning Web Components (LWC), Salesforce Flow, Salesforce Sites

Salesforce Clouds: Public Sector Solutions (PSS), Experience Cloud (LWR)

OmniStudio: OmniScripts, FlexCards, DataRaptors, Integration Procedures

AI & Automation: AgentForce Agents, Prompt Templates, Lightning Types, Document Classification, Smart Search

Integrations: REST APIs, Apex Callouts, NMVTIS, Melissa API

Tools: JIRA, Git, VS Code, Postman, Salesforce CLI, Salesforce DX (SFDX)

ACHIEVEMENTS

- Promoted from Analyst to DC Engineer 1 at Deloitte USI.
- Delivered 6+ Salesforce assets across government, healthcare, licensing, defense, and social programs using Apex, LWC, and OmniStudio.
- Architected AI-driven community engagement compliance platform integrating AgentForce agents, Lightning types, and prompt templates.
- Improved search accuracy in Medicaid systems through AgentForce policy engine and Smart Search integration.
- Reduced application input errors in DMV through AI-based document validation.
- Improved asset processing time in DMV and Medicaid through LWC and OmniStudio optimization.
